

Check Writer Layout Editor

Select the Check Writer Layout Editor to adjust the location of your entries as per your check number, payee, amount, memo and voucher.

Take your pre printed check and place a blank piece of paper evenly behind or in front of or behind your pre printed check, view them together against the light and view your existing entry. If adjustments are needed go back to the Layout Editor and click on the blue box to relocate the information so they will line up on your check. Continue with your next selection if needed to adjust the placement of items as listed in the first paragraph.

Scroll down to Check Writer Layout Editor

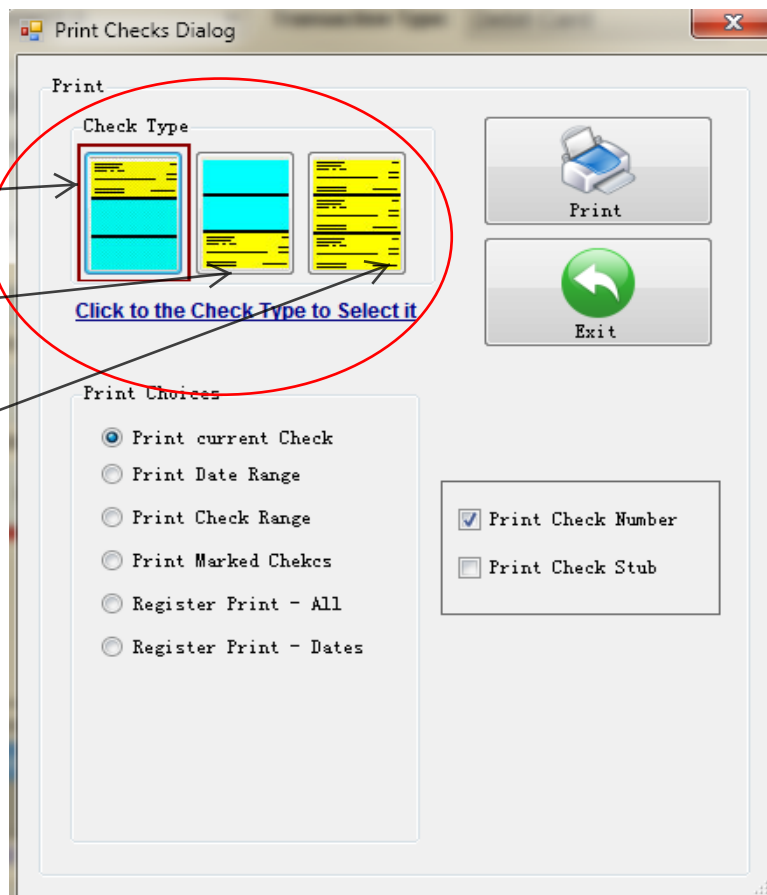

Click on Settings on the Main Tool Bar

Top Check
